

Product Requirements Document (PRD)

Project Overview

‘AI-Powered Placement Management Platform’ is a centralized system designed to streamline campus placement activities for students, recruiters, and placement coordinators. The platform leverages AI to provide resume analysis, job recommendations, and placement insights while simplifying recruitment workflows.

Problem Statement

Current Challenge	Impact
Manual tracking of applications	Time-consuming and error-prone
Lack of personalized job recommendations	Students miss relevant opportunities
Resume screening requires significant effort	Delays recruitment process
Limited placement analytics	Difficult to measure placement performance
Communication scattered across platforms	Poor user experience

Product Goals

Goal	Success Metric
Simplify placement management	Reduce manual tracking effort
Improve student-job matching	Higher application success rate
Automate resume evaluation	Faster screening process
Provide actionable analytics	Better placement insights
Enhance user experience	Increased platform engagement

Target Users

User Type	Responsibilities	Key Needs
Students	Apply for jobs and internships	Resume feedback, job discovery, application tracking
Recruiters	Hire candidates	Job posting, applicant management
Placement Officers	Manage campus placements	Reports, monitoring, coordination
Administrators	Manage platform operations	User and system management

Core Features

Student Module

Feature	Description	Priority
Registration & Login	Secure account access	High
Profile Management	Manage academic and skill information	High
Resume Upload	Upload resumes for applications	High
AI Resume Analysis	Resume scoring and suggestions	High
Job Recommendations	Personalized job suggestions	High
Application Tracking	Track application status	High

Recruiter Module

Feature	Description	Priority
Recruiter Dashboard	Centralized recruiter workspace	High
Job Posting	Create and manage openings	High
Candidate Filtering	Search suitable applicants	Medium
Shortlisting	Select qualified candidates	High
Interview Scheduling	Manage interview process	Medium

Placement Officer Module

Feature	Description	Priority
Student Management	Manage student records	High
Company Management	Maintain recruiter database	High
Placement Reports	Generate placement statistics	Medium
Analytics Dashboard	Visual placement insights	Medium

AI Features

Feature	Description	Priority
Resume Scoring	Evaluate resume quality	High
Skill Gap Analysis	Identify missing skills	Medium
Job Matching Engine	Recommend suitable jobs	High
Interview Question Generator	AI-generated preparation questions	Medium

Functional Requirements

Requirement ID	Requirement
FR-01	Students must be able to register and login
FR-02	Students must be able to upload resumes
FR-03	Recruiters must be able to post jobs
FR-04	Students must be able to apply for jobs
FR-05	AI should analyze resumes and provide feedback
FR-06	System should recommend jobs based on skills
FR-07	Placement officers should access placement reports
FR-08	Users should receive application status updates

Non-Functional Requirements

Category	Requirement
Performance	Page load time under 3 seconds
Security	Encrypted passwords and secure authentication
Availability	99% uptime
Scalability	Support growing student and recruiter base
Reliability	Regular backups and data recovery mechanisms
Usability	Responsive and user-friendly interface

Success Metrics (KPIs)

Metric	Target
Student Registration Rate	> 80% eligible students
Resume Upload Completion	> 90% registered students
Job Application Rate	> 70% active users
Recruiter Participation	Increase semester-wise
Average Resume Analysis Time	< 10 seconds
Platform Uptime	> 99%
User Satisfaction Score	> 4/5

Assumptions & Constraints

Assumptions	Constraints
Students have internet access	Limited project timeline
Recruiters actively use the platform	Budget limitations
Resume data is available digitally	Dependence on AI model accuracy

Future Enhancements

Feature	Business Value
AI Mock Interviews	Better student preparation
Resume Builder	Improved resume quality
Mobile Application	Increased accessibility
AI Career Roadmaps	Personalized growth plans
Chatbot Support	Faster user assistance

Conclusion

The AI-Powered Placement Management Platform aims to modernize campus recruitment by combining placement management functionalities with AI-driven insights. The platform will improve efficiency for placement officers, simplify recruitment for companies, and help students secure relevant opportunities through personalized recommendations and resume analysis.
